Mónica Calle

UX/UI Designer with a Frontend background

Professional Profile

UX/UI Designer with a Frontend background, specialized in creating cohesive digital experiences where design and code align. I bridge the gap between high-fidelity prototyping in Figma and technical implementation through React, JavaScript, and Webflow. By leveraging Adobe Creative Suite (Illustrator, Photoshop, InDesign), I enhance visual storytelling and asset creation to deliver scalable, user-centered products that blend creative strategy with technical feasibility.

monicacalle369@gmail.com | +34 664374675 | Valencia, Spain | Portfolio

Technical Skills

Design Tools: Figma, Adobe Illustrator, Photoshop, InDesign.

Development: JavaScript, React.js, HTML5, CSS3, Git.

No-Code/CMS: Webflow, WordPress.

Education

Advanced Degree in Graphic Design, Conceptualization (UX/UI) & Web Design | **CEI**

Full Stack Developer | **4Geeks Academy** (2023)

Soft Skills

Adaptability | Active Listening & Feedback | Cross-functional Collaboration | Attention to Detail

Professional Experience

WordPress & UX/UI Developer | Neerutech

November 2025 – Present

- Translate client ideas into functional prototypes in Figma, ensuring design feasibility before the development phase.
- Develop and configure WooCommerce stores, managing everything from UI design to bulk data migration of catalogs and products.
- Continuously optimize User Experience (UX) for existing websites, refining visual details and navigation for more intuitive interactions.

Key Achievements:

- Executed complex bulk data migrations with zero downtime, maintaining store operations.
- Streamlined decision-making processes through visual prototyping, reducing last-minute design changes.
- Resolved critical usability issues, resulting in smoother and more professional user flows.

Frontend Developer (React JS) | Neerutech

2023

- Implemented new frontend features focusing on reusable components to ensure scalability.
- Collaborated with design, product, and backend teams to ensure seamless integration of new features.
- Performed code reviews for peers, helping to maintain high quality and performance standards within the team.

Key Achievements:

- Implemented a comprehensive user notification and preference system, improving real-time access to information.
- Enhanced user experience through advanced filters and direct interface adjustments.
- Debugged legacy code, resolving critical bugs and increasing overall system stability.
